

**SECOND REVISIONS FOR PAPER “MULTIPLICATIVE STRUCTURE IN  
THE STABLE SPLITTING OF  $\Omega SL_n(\mathbb{C})$ ”**

JEREMY HAHN AND ALLEN YUAN

We thank the referee for the additional comments. We have made the following changes in response to the comments:

- We have included in the Introduction more discussions of the categories of filtered and graded spectra, as suggested.
- We believe the top line of the pullback below the statement of Corollary 3.19.1 is as intended.
- We have fixed the typo in the last paragraph of Section 3 that was pointed out.

Finally, we fixed an additional typo that we found after the proof of Proposition 3.17. We had written that we were proving Theorem 3.5, but we have now corrected it to say that we are proving Theorem 3.10.
